

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: Claims 1-15 are allowable over prior art references because related references do not disclose all the limitations of the claims, in particular, correlation of a received signal with a training signal concurrently and in parallel with phase error estimation, both occurring during the training signal interval of a burst signal, wherein the phase error is used to estimate a response characteristic of the received signal by compensating a result of the correlation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
